## PROFESSIONAL SUMMARY

Machine Learning Engineer with hands-on experience in building end-to-end ML pipelines and data-driven solutions. Skilled in data preprocessing, feature engineering, model evaluation, and transforming complex datasets into accurate predictive models. Passionate about applying AI to solve real-world problems and continuously improving technical and practical expertise through real-world projects.

---

## INTERNSHIP

Machine Learning Trainee — National Telecommunication Institute (NTI)

2026

Completed intensive training in Machine Learning covering ML fundamentals, data analysis, predictive modeling, and real-world project implementation. Gained hands-on experience in data preprocessing, feature engineering, model evaluation, and building practical machine learning solutions using Python.

---

## FEATURED PROJECTS

### Bank Term Deposit Prediction — ML Pipeline

Role: Data Scientist / ML Engineer • Duration: 1 Week • Status: Completed

#### Overview

End-to-end ML pipeline predicting bank term deposit subscriptions using UCI Bank Marketing Dataset (~45K records). Demonstrates real-world ML workflow from data processing to model evaluation.

#### Key Challenges

- Severe class imbalance (~88% vs ~12%)
- Avoiding data leakage
- Ensuring reproducibility
- Improving minority class prediction

Technologies: Python-pandas • NumPy-scikit-learn-matplotlib • seaborn-XGBoost

---

## EDUCATION

Zagazig National University — Faculty of Computers and Information

Bachelor’s Degree in Artificial Intelligence & Data Analysis

Expected Graduation: 2028

---

## SKILLS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                        |
